

### Go

Trudny początek drogi od admina do DevOps'a

Wojciech Chojnowski

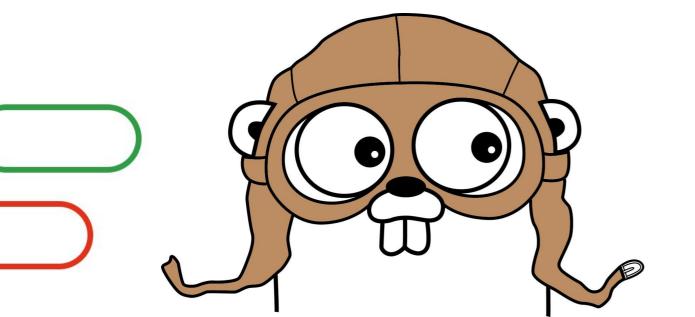

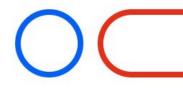

http://piwik.pro

#### Agenda

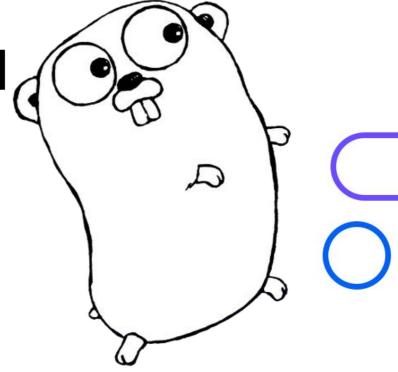

- Co wyróżnia Go
- Ubrudźmy łapki Prometheus exporter
- Docker image
- Skąd czerpać wiedzę

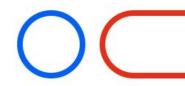

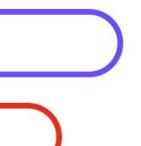

- Kompilowalny
- Statycznie typowany
- Natywnie współbieżny
- Wyposażony w garbage collector
   [1]

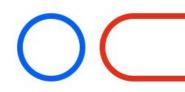

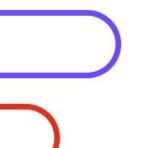

## Intencje autorów

- Szybka kompilacja
- Możliwe automatyzowanie wprowadzania kodu
- Narzędzia biblioteki standardowej
- Obietnica kompatybilności [2]
- Współbieżność [3]

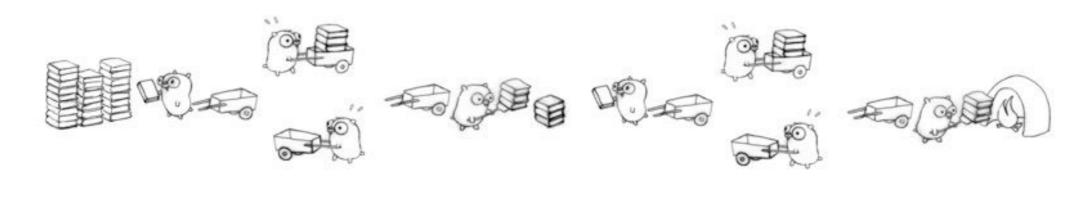

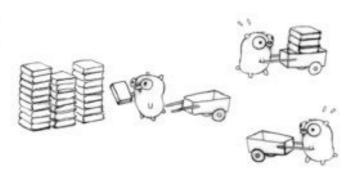

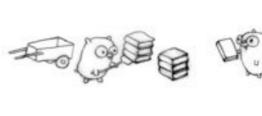

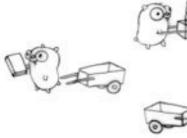

# Współbieżność

The motto is, "Don't communicate by sharing memory, share memory by communicating." [1]

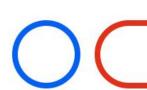

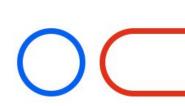

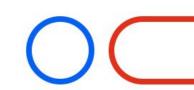

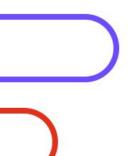

# Funkcje

```
func sayHello(name string) string {
  msg := "Hello, " + name
  return msg
}
[ClickMe]
```

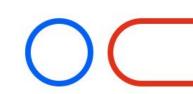

## Struktury danych

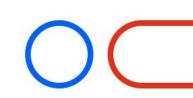

```
type Node struct {
  name string
  ip [32]byte
}
```

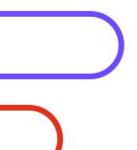

### Metody

```
func (n *Node) Adress() [32]byte {
  ip := n.ip
  return ip
}
```

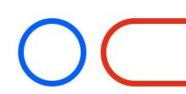

## Interfejsy

```
type Addresser interface {
   Addres() [32]byte
}
[NowClickMe]
```

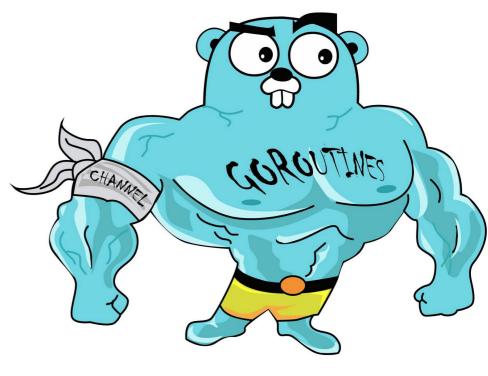

### Goroutines

https://gobyexample.com/goroutines

### Docker image

Oh cool only 21.2MB with everything i need for my go app. [4]

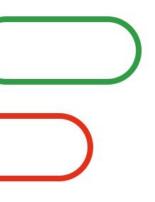

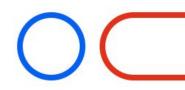

# Skąd czerpać wiedzę
